Gravity Grand Prix

TEAM NAME: _____

🎯 Your Mission

Design and build tires for your mini 4WD car so it travels the longest distance after rolling down a ramp.

🔧 Engineering Design Section

You are not only assembling the wheels.

You must DESIGN the tires using available materials to help your car travel the longest distance.

🧰 Available Materials

- Newspaper
- Paper towels
- A4 paper
- Rubber bands
- Sponge Pieces
- Smooth tape
- Aluminum foil
- Drinking straws
- Loads
- Paper clips

🧠 Design Thinking Questions

- Do you want more friction or less friction after reaching the ground?
- What kind of surface will help your car roll longer?
- Should the tire be soft or hard?
- Will heavier wheels help or slow the car?
- What shape makes the wheel roll smoothly?

✏ Design Thinking Questions
